

Dataset v1 taxonomy

Stage 1 uses ID data only; OOD groups are evaluation stress tests.

ID FAF

Stage 1 fitting rows
and ID evaluation rows

OOD: modality shift

colour fundus
OCT screenshots

OOD: sensory artefact

watermark, annotations
blur, crop, noise, JPEG

OOD: semantic outlier

natural-image outliers
non-FAF content

Stage 2 reason-attribution splits are explanation-only OOD splits; the ID test split uses synthetic FAF fallback.
